Opinion

Microbiological studies in the Dead Sea: future challenges toward the understanding of life at the limit of salt concentrations
by Aharon Oren 1–9

Environmental variability and the population dynamics of the exotic *Daphnia lumholtzi* and native zooplankton in Lake Texoma, U.S.A.
by Kirsten Work & Moshe Gophen 11–23

Meiofauna of esker groundwaters in Finland
by Jukka Särkkä & Jorma Mäkelä 25–37

The life cycle of *Cordulegaster boltonii* (Donovan, 1807) (Odonata: Cordulegastridae) in the Sierra Morena Mountains (southern Spain)
by Manuel Ferreras-Romero & Philip S. Corbet 39–48

Distribution of amphibian larvae in Israeli habitats with changeable water availability
by Gad Degani & Didi Kaplan 49–56

Current status of the Anostraca of Italy
by Graziella Mura 57–65

The Snag Bag: a new method for sampling macroinvertebrate communities on large woody debris
by J.E. Growns, A.J. King & F.M. Betts 67–77

The long term effect of forest logging on the macroinvertebrates in a Fijian stream
by Alison Haynes 79–87

Rotifera from a high-altitude Lake in Southern India, with a note on the taxonomy of *Polyarthra* Ehrenberg, 1834
by H. Segers & S. Babu 89–93

Nematodes from the Strait of Magellan and the Beagle Channel (Chile): the genus *Sabatieria* (Comesomatidae: Nematoda) with the description of *Sabatieria coomansi* n. sp.
by Guotong Chen & Magda Vincx 95–116

International study on *Artemia*. LX. Allozyme data suggest that a new *Artemia* population in southern Chile (50° 29′ S; 73° 45′ W) is *A. persimilis*
by Gonzalo Gajardo, Claudia Mercado, John A. Beardmore & Patrick Sorgeloos .. 117–123

Larvae of *Ostrea edulis* (L.) during starvation: growth, energy and biochemical substrates
by U. Labarta, M.J. Fernández-Reiriz & A. Pérez-Camacho 125–131
Soft-bottom fauna with emphasis on nematode assemblage structure in a tropical intertidal lagoon in Zanzibar, eastern Africa: I. spatial variability
by Simon G.M. Ndaro & Emil Ólafsson 133–148
Vertical gradients for particulate Cu fractions in estuarine water over tidal flats
by L.J.A. Gerringa, H. Hummel & T.C.W. Moerdijk-Poortvliet 149–162
Some effects of submarine pipeline construction on the sessile zoobenthic community of Redang Island
by Hamid Rezai, H.M. Ibrahim, B.A.G. Idris & M.R.M. Kushairi 163–167
The restoration of riparian wetlands and macrophytes in Lake Chao, an eutrophic Chinese lake: possibilities and effects
by Fu-Liu Xu, Shu Tao & Zhuo-Ran Xu 169–178
Respiration and feeding of the surf clam *Paphies donacina* from New Zealand
by I.D. Marsden 179–188
Phenology of invertebrates living in a sahelian temporary pond
by Joost Lahr, Alpha O. Diallo, Khalifa B. Ndour, Aliou Badji & Papa S. Diouf ... 189–205
On the relative importance of pool morphology and woody debris to distributions of shrimp in a Puerto Rican headwater stream
by Mark Pyron, Alan P. Covich & Robert W. Black 207–215

Research note
An assessment of carbon dioxide gassing as a sampling technique for studies of the nekton of soft-sediment intertidal pools
by J.T.B. Kwik & I.R. Tibbetts 217–220

Book reviews 221–229
